

### Unleash the Power of EQulS Data

Directly and easily access EQulS data quickly and securely in Microsoft Power BI Desktop via the EQulS REST API.

View analytics in advanced ways in real time. Share EQulS information across organizations easily and efficiently with Power BI collaboration tools.

Available via the REST API License.

### User Authentication

Users assigned the REST API role can access an EQulS Enterprise site in Power BI via their EQulS username and password, an API token, or Microsoft Entra ID account.

API Tokens are generated in the User Profile Editor in EQulS Enterprise.

### Features

EQulS and Microsoft deliver a powerful, secure environmental data management platform. Supported EQulS data sources include:

- EQulS Facilities (must have user permissions)
- Locations for EQulS Facilities
- EQulS Reports
